

Sébastien HEUZE

SOFTWARE ARCHITECT

EDUCATION

2015 - Master's degree MIAGE - Nantes

2013 - Bachelor's 3rd year MIAGE - Nantes

2012 - Professional Bachelor, Application Integration and Maintenance - Vannes

2011 - DUT Computer Science - Vannes

EXPERIENCE

May 2025

Present

PROLOGISTIK FRANCE - SOLUTIONS ARCHITECT

- Kafka referent on the design and rollout of this new messaging solution within the IS: architecture definition, implementation of inbound/outbound flows, and integration of new clients.
- Cross-functional involvement in software architecture activities: design of application and technical architectures, selection of patterns and technologies, definition of development and security standards, and ensuring long-term consistency of the IS.
- Support for project and development teams: technical framing, architecture and code reviews, mentoring on skills development.

October 2018

Present

PROLOGISTIK FRANCE - TECHNICAL LEAD R&D

- Involvement from the design phase in building a data analysis and visualization application (charts, dashboards), including the development of a custom in-memory database, optimized for performance and memory usage.
- Implementation of a Data Warehouse via Kafka, aggregating data from multiple applications into BigQuery and PostgreSQL. Architecture of KStream projects, addition of a complete error handling system, monitoring, and automated tests with Testcontainers.
- Ownership and evolution of the software factory: maintenance, industrialization, and addition of new CI/CD pipelines.
- Design and maintenance of shared technical foundations used across all Prologistik applications.
- Implementation of centralized authentication via Keycloak

September 2017

October 2018

CAPGEMINI - JUNIOR SOLUTIONS ARCHITECT

- Proposal of software architectures, design of SNCF applications,
- interoperability between applications, security and reliability improvements for SNCF mobile application backends

February 2017

October 2018

CAPGEMINI - LEAD TECH JAVA/ANGULAR

- Creation of technical foundations, oversight of several development teams,
- implementation of best practices, onboarding and training of newcomers,
- quality monitoring of a project across multiple SNCF backends.

September 2015

February 2017

CAPGEMINI - SOFTWARE ENGINEER

- Development of various applications (Java, Angular, Mobile) for SNCF

September 2013

September 2015

CAPGEMINI - APPRENTICE SOFTWARE ENGINEER

September 2011

September 2012

ATOS - APPRENTICE ANALYST DEVELOPER

- Third-party application maintenance for France Télécom (Vantive Project)

PROFILE

Passionate about tech, I keep up with the field continuously, take on varied technical challenges, and adapt quickly to optimize both development and production.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

Java 21+, SpringBoot 3.5,
TypeScript, Angular

CLOUD & INFRA PLATFORMS

GCP, Docker, K8S, Grafana, Ansible

AUTH

Keycloak, Authelia, OAuth2

DATA & MESSAGING

Kafka, Kafka Connect, Kafka Streams
PostgreSQL, Bigquery, Hibernate

CI/CD & AUTOMATION

Gitlab-CI, Jenkins,

OBSERVABILITY & QUALITY

Grafana, Sonarqube, Gatlin

SIDE PROJECTS

Self-hosted websites + NAS storage on a personal server including security hardening, backup, monitoring and deployment via Docker. Proxmox experiments.

Home automation system running on Home Assistant.

Development of a website leveraging online game data through reverse engineering, handling over 100,000 requests/day. (2015-2024)
